Name:_____ Date:_____

**Instructions**

Find the unknown divisor.

**Example**

Problem: $24 \div ? = 6$

To find the unknown divisor, we divide the dividend by the quotient.

$$? = 24 \div 6$$
$$? = 4$$

Answer: 4

1. $21 \div ? = 7$
2. $45 \div ? = 9$
3. $48 \div ? = 8$
4. $40 \div ? = 10$
5. $35 \div ? = 5$
6. $72 \div ? = 9$
7. $54 \div ? = 6$
8. $24 \div ? = 12$
9. $35 \div ? = 7$
10. $36 \div ? = 6$
11. $27 \div ? = 9$
12. $56 \div ? = 7$
13. $36 \div ? = 9$
14. $49 \div ? = 7$
15. $50 \div ? = 5$
16. $33 \div ? = 11$
17. $72 \div ? = 8$
18. $30 \div ? = 6$
19. $48 \div ? = 12$
20. $42 \div ? = 7$
21. $48 \div ? = 6$
22. $63 \div ? = 9$
23. $24 \div ? = 8$
24. $55 \div ? = 11$
25. $32 \div ? = 8$
26. $18 \div ? = 9$
27. $30 \div ? = 5$
28. $36 \div ? = 12$
29. $45 \div ? = 5$
30. $42 \div ? = 6$
31. $40 \div ? = 8$
32. $28 \div ? = 7$
33. $40 \div ? = 4$
34. $20 \div ? = 10$
35. $40 \div ? = 5$
36. $18 \div ? = 6$
37. $36 \div ? = 4$
38. $54 \div ? = 9$
39. $44 \div ? = 11$
40. $25 \div ? = 5$
41. $56 \div ? = 8$
42. $22 \div ? = 11$
43. $30 \div ? = 10$
44. $24 \div ? = 4$
45. $50 \div ? = 10$
46. $63 \div ? = 7$
47. $64 \div ? = 8$
48. $24 \div ? = 6$
49. $15 \div ? = 3$
50. $16 \div ? = 8$
51. $12 \div ? = 4$
52. $20 \div ? = 5$
53. $60 \div ? = 10$
54. $12 \div ? = 3$
55. $81 \div ? = 9$
56. $20 \div ? = 4$
57. $14 \div ? = 7$
58. $32 \div ? = 4$
59. $60 \div ? = 6$
60. $21 \div ? = 3$
61. $18 \div ? = 6$
62. $28 \div ? = 4$
63. $30 \div ? = 3$
64. $64 \div ? = 16$

Prerequisites: 3.2.2, 3.2.3. - You can have a discussion with the class about why finding the divisor versus the dividend requires two different approaches (division is not commutative).
