

Name: \_\_\_\_\_ Date: \_\_\_\_\_

**Instructions**

Write the time shown on each clock.

**Example**

Problem: What time is shown on the clock?

The last tick the hour hand (short hand) passed was 10, and the minute hand is on 3, which indicates  $3 \times 5 = 15$  minutes.

Answer: 10:15

1.

5.

9.

2.

6.

10.

3.

7.

11.

4.

8.

12.

This will require knowledge that to tell minutes, each tick indicates 5 minutes. When the minute hand is at 12, this resets the minutes back to 0.
