**Instructions**

Solve each word problem using division. The answer should include words. Hint: The problems can be of the form  $6 \div 3 = ?$ ,  $6 \div ? = 2$ , or  $? \div 3 = 2$ .

**Example**

Problem: Ms. Johnson has 12 markers. She wants to put them equally into 3 cups. How many markers will be in each cup?

$$12 \div 3 = ?$$

Use the clues from the problem to write a division problem

$$12 \div 3 = 4$$

Solve the new problem

Answer: 4 markers in each cup

1. Oliver has 15 stickers. He wants to share them equally with 5 friends. How many stickers will each friend receive?

2. A teacher has some students in class. She puts them into 3 equal groups with 6 students in each group. How many students are in the class?

3. Sofia bought 20 cookies. She wants to put them equally on 4 plates. How many cookies will be on each plate?

4. Mr. Patel has 24 toy cars. He wants each box to have 4 cars. How many boxes will he need?

5. Fatima has 8 apples. She wants to give the same number of apples to 2 friends. How many apples will each friend receive?
