

Name: _____ Date: _____

Definitions

Unit square: A square with a side length of 1 unit. The area of a unit square is 1 square unit.

Instructions

Count the unit squares to find the area of each shape.

Example

Problem: Find the area of the rectangle.

To find the area, we need to count the number of unit squares. Since this is a rectangle, we can use multiplication.

$$\begin{aligned} \text{Area} &= 4 \times 3 \\ &= 12 \text{ square units} \end{aligned}$$

Answer: 12 square units
