

# Lesson 7.9 Measuring Perimeter

**Perimeter** is the distance around a shape.

To calculate perimeter, add together the lengths of all the sides.

$$\text{Perimeter} = 17 \text{ in.} + 10 \text{ in.} + 17 \text{ in.} + 10 \text{ in.}$$

$$\text{Perimeter} = 54 \text{ in.}$$

Find the perimeter of each shape.
